Patentee and Manufacturer of Frink's Improved Silver-plated Corrugated Crystal or Opal Glass Reflectors, for Lighting and Ventilating Churches, Halls, Theatres, Banks, Stores, Offices, Armories and Public Buildings.

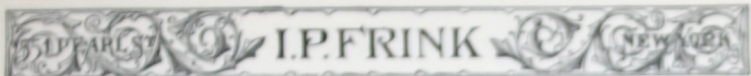

Prismatic Reflecting Chandeliers and Sunlights of every style and design to order.

Protected by the following Patents:

April 10, 1860.	Feb. 8, 1870 (No. 3826).	April 3, 1883.
April 17, 1860.	Feb. 8, 1870 (No. 3827).	Feb. 16, 1892.
June 12, 1860.	April 9, 1872.	April 20, 1897 (No. 581,093).
Dec. 24, 1861.	April 17, 1874.	April 20, 1897 (No. 581,094).
June 8, 1869.	May 20, 1879.	Dec. 14, 1897.
July 7, 1869.	Jan. 10, 1882.	

Beware of Worthless Imitations, infringing my Patents, and rendering the Purchaser liable to Prosecution for Infringement.

ALL THE GENUINE HAVE MY NAME ATTACHED.

QUALITY

QUANTITY.

ECONOMY.

*The first prize at the first great American Exposition.
The first prize at the last great World's Fair.*

We have made Church and Public Hall Lights for over forty consecutive years.

We are the oldest light makers.

We never have, don't, and never will, make cheap goods.

It pays us to satisfy.

Quality for quality we will compete with everybody, as we can give the best cheaper than can anybody else.

We will not compete with makers of questionable Reflectors.

The Reflector that lasts, and reflects all the light there is, costs more to manufacture, than cheap dealers ask for cheap goods.

Our Reflectors are custom made, with angles adapted to their work.

Our Reflectors are harmonizing—they fit in looks, and fit in work.

The earlier you order the better we will satisfy you, and the more you will save in transportation charges.

The risk of transportation breakage is ours.

We guarantee absolute satisfaction, if you give us the correct dimensions and follow our recommendations.

Large rooms and halls need suspended Reflectors, for they increase the light four-fold, and give none of the eye-injuring glare of direct chandelier light, and they are too high to obstruct the view.

Our reputation is based upon over forty years of honest work.

Some irresponsible dealers, when ordered to purchase Frink's Reflectors, use cheap substitutes. We hear of this often. Will you not report substitution to us, for the sake of honesty, and for the sake of more light?

SPECIAL.

Established 1857.

Frink's Improved and Patented Reflectors

are in every district in the country. Really you see them everywhere. They represent the perfection of modern art and quality—they are up to the times. Our expert artists are constantly designing new and improved forms.

We claim that our Reflectors are the only ones satisfactory and economical.

Our Reflectors are of the best crystal corrugated glass, of double silver plate, coated on the back with heat and moisture proof cement. They last.

All of our Reflectors are positively guaranteed. Satisfaction is sure.

We furnish every kind and description of fixture required for church or other lighting, and will cheerfully answer any question regarding same.

SPECIAL DESIGNS in Reflectors and Reflecting Chandeliers furnished upon request.

The prices for Combination or Electric Fixtures include Wiring and Insulating Joints, but *not* the *Sockets or Lamps*.

Our Reflectors work equally as well with low as with high ceilings.

SEND us the DIMENSIONS and HEIGHT of CEILING, so that we may properly adjust the angles of the Reflector.

Patented and guaranteed.

Frink's Reflectors are fully protected by patents, and all of them are stamped with our name.

They are all up to date with the most modern improvements in material, design, finish and burners.

They are presented as the best and cheapest for lighting churches, halls, stores, office and public buildings.

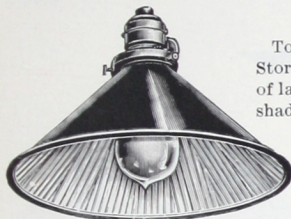

Do not accept imitations, as the purchaser, as well as the seller, is liable to prosecution for infringement.

If they are Frink's, they light.

A reasonable amount will be charged extra for boxing and shipping.

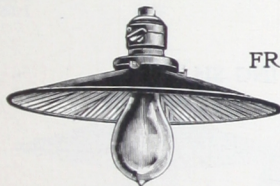

FRINK'S DEEP REFLECTING SHADE.

Enameled Dark Green Outside, Lined with Silvered Corrugated, Mirror or Opal Glass.

No. 2624.

No.	Diameter in Inches.	Glass.	For Holder.	List Price Each.	Net Price Each.

FRINK'S SECTIONAL GLASS ELECTRIC CLUSTER REFLECTORS.

With 3 to 10 lights, lined with Frink's Silver-plated Corrugated Glass, the best known diffuser of light, should be generally used for lighting Stores, Banks, Waiting Rooms, Depots, Hospitals, Schools, Offices, Factories, etc.

To obtain best results from cluster lights, use 20½-inch Reflectors

No. 2698.
PLAIN.

REFLECTOR, with cluster, canopy, crow-foot, and 18-inch stem wired, complete without sockets:

No.	Diam. in Inches.	Glass.	No. of Lamps.	List Price Each.	Net Price Each.
2697	18	Silv. Corr.	3	\$6 00	\$3 60
2698	20½	"	4	6 75	4 05
2699	25	"	6	8 75	5 25
2700	30	"	8	11 50	6 90
2701	35	"	10	14 50	8 70

No. 2703.
BRASS BAND,
PLAIN OR
EMBOSSSED.

REFLECTOR, with cluster, canopy, crow-foot, and 18-inch stem wired, complete without sockets:

No.	Diam. in Inches.	Glass.	No. of Lamps.	List Price Each.	Net Price Each.
2702	18	Silv. Corr.	3	\$7 50	\$4 50
2703	20½	"	4	8 25	4 95
2704	25	"	6	11 00	6 60
2705	30	"	8	15 00	9 00
2706	35	"	10	20 00	12 00

Wired for sockets as indicated; if ordered for more or less sockets, add or deduct fifteen cents each, list.

For price of reflector, cluster and holder for ¼-inch iron or ½-inch brass pipe, deduct \$2.00 from list or \$1.20 from net price.

To order these parts only, add an "S" after the number, indicating complete fixture, thus, "2703 S" means a 20½-inch silvered corrugated glass reflector, cluster and holder for ¼-inch iron or ½-inch brass pipe (but no stem).

If so ordered, these fixtures will be furnished with nipple to take stalactite, as shown on cut No. 2779, page 21, at an additional cost of 25 cents list, 15 cents net.

Patented December 14, 1897.

These Reflectors have solid metal frames, and are lined with Silver-plated Corrugated Mirror, or Opal Glass in sections, rigidly held in place, making them far superior to the ordinary opal reflector shades, as there is no danger of the pieces breaking and falling on the heads of persons beneath, as with the opal shades; and now that we are able, by the aid of expensive machinery, to furnish at about the same price as the ordinary opal reflector shades, they are being specified by leading architects and engineers, and everywhere extensively used.

REFLECTOR, with cluster, canopy, crow-foot, and 18-inch stem wired, complete without sockets:

	No.	Diam. in Inches.	Glass	No. of Lamps.	List Price Each.	Net Price Each.
No. 2708.	2707	18	Best Mirror	3	\$5 75	\$5 45
PLAIN.	2708	20 $\frac{1}{4}$	" "	4	6 50	5 90
	2709	25	" "	6	8 50	5 10
	2710	30	" "	8	11 50	6 90
	2711	35	" "	10	15 00	9 00

REFLECTOR, with cluster, canopy, crow-foot, and 18 inch stem wired, complete without sockets:

No. 2713.	No.	Diameter in inches.	Glass.	No. of Lamps.	List Price Each.	Net Price Each.
BRASS BAND,	2712	18	Best Mirror	3	\$7 00	\$4 20

2726	35	"	10	17 00	10 20

Wired for sockets as indicated ; if ordered for more or less sockets, add or deduct fifteen cents each, list.

For price of reflector, cluster, and holder for ¼-inch iron or ½-inch brass pipe, deduct \$2.00 from list or \$1.20 from net price.

To order these parts only, add an "S" after the number indicating complete fixtures, thus: "2723 S" means a 20½-inch opal glass reflector, cluster and holder for ¼ inch iron or ½-inch brass pipe (but no stem).

If so ordered, these fixtures will be furnished with nipple to take stalactite, as shown on cut No. 2779, page 21, at an additional cost of 25 cents list and 15 cents net.

Patented December 14, 1897.

BRIGHT CORRUGATED METAL CLUSTER REFLECTOR.

Designed for use where a cheaper and durable cluster reflector is needed.

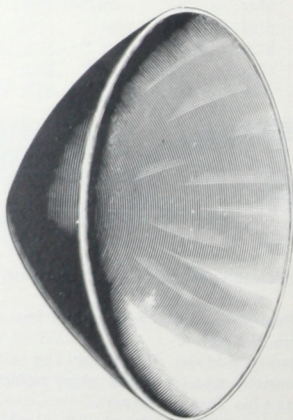

No. 2727.

No.	Diameter in Inches.	Number of Lamps.	List Price.	Net Price.
2727	20½	4	\$5 00	\$3 00

Price includes reflector, canopy, crow-foot, cluster, and stem wired, but no sockets or lamps.

PARABOLIC REFLECTOR.

No. 2728.

Prices given on application.

FRINK'S COMBINATION CLUSTER REFLECTOR.

Length, 30 inches; wired, without
sockets or lamps.

With four gas burners and wired
for four sockets; if ordered for more
or less sockets, add or deduct fifteen
cents each, list.

No. 2729.

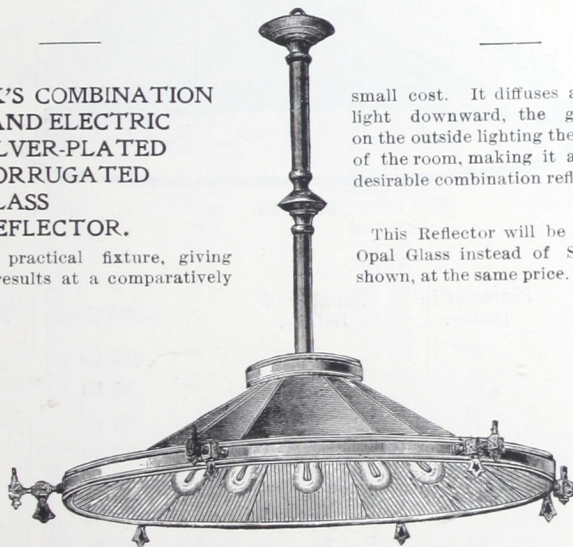

No.	Diam. Reflector in Inches.	Entire Spread in Inches.	Glass.	List Price Each.	Net Price Each.
2729	20 1/4	23	Silvered Corrugated	\$11 00	\$6 60
2730	20 1/4	23	Best Mirror	10 00	6 00
2731	20 1/4	23	Opal	10 00	6 00

FRINK'S COMBINATION GAS AND ELECTRIC SILVER-PLATED CORRUGATED GLASS REFLECTOR.

A truly practical fixture, giving
splendid results at a comparatively

small cost. It diffuses a powerful
light downward, the gas burners
on the outside lighting the upper part
of the room, making it a cheap and
desirable combination reflector.

This Reflector will be made up in
Opal Glass instead of Silvered, as
shown, at the same price.

No. 2736.

No.	Diameter in Inches.	No. of Electric Lamps.	No. of Gas Burners.	Combination. List.	Net.

We will make this Reflector up in Opal Glass instead of Silvered, at the
same price as quoted above.

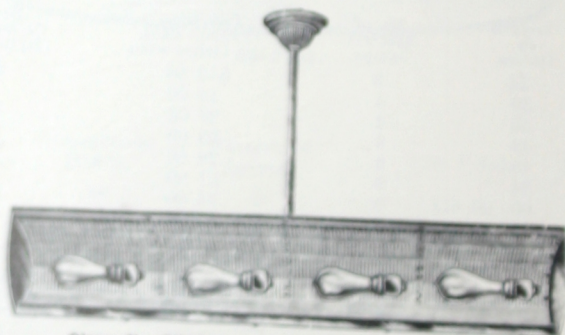

STORE WINDOW LIGHTING.

Ninety-nine per cent. of store windows are imperfectly lighted, and especially so where electric lamps are used. Most of the lamps are scattered on the bottom and at the sides of the windows where they can be seen by lookers-in, and where they attract more attention to *themselves* than to the goods they are imperfectly lighting. The *ideal* window light should light the *goods* and not be seen while doing so.

Frink's Special Patent Window Reflector,

for Electric Light, lined with Silver-plated Corrugated Glass, is placed in top of window near the front glass, reflecting the light inward and downward. This makes a very desirable window reflector, as the reflectors are up out of the way and concealed from view, at the same time concealing the direct light from the eyes of the observer, and giving a strong, even light down where wanted, thus doing away with the annoyance of a dazzling light in the eyes. We strongly recommend this style of reflector as the very best store window light in existence, and it has been adopted by the leading stores in the principal cities of the United States. It is largely used also for lighting Art Galleries, Pictures, Stock Exchange Boards, Border Lights, Telephone Switch Boards, etc.

TO GET BEST RESULTS, REFLECTORS SHOULD BE USED ENTIRE WIDTH OF WINDOW WITH LAMPS 9 OR 12 INCHES APART, AS DESIRED.

Glass, No. 2756.

Metal, No. 2757.

Suspended from ceiling with one or more stems as required.

SPECIAL REFLECTING FIXTURES

FOR DRAWING ROOMS, MUSIC ROOMS, ART GALLERIES, ETC.

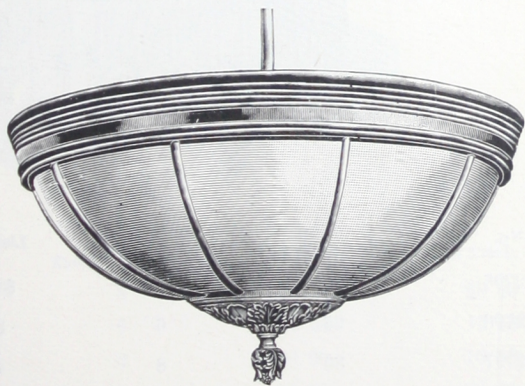

No. 2793.

Center Light Reflector, made up on special lines, showing several angles, lined with Silver-plated Corrugated or Opal Glass and finished in polished or antique brass, as preferred, with ornamental brass plate on bottom. For lighting Drawing Rooms, Music Rooms, Art Galleries, etc., where the pictures are to be lighted from a center fixture, insuring an even and thorough distribution of the light and giving the best results attainable.

No.	Diameter in Inches.	No. of Electric Lamps.	List Price.	Net Price.
2792	25	10	\$75 00	\$37 50
2793	30	12	90 00	45 00

Special Center Fixture, for general use where it is desirable to have a strong light throughout the room, with the lights concealed from view. This fixture contains a powerful reflector, similar to that shown in cut No. 2159 above, which evenly diffuses a strong but subdued light, soft and pleasing in its effect. The reflector and lights are concealed from the eye by a glass dome. It is finished with brass band, and has a very handsome,

No. 2794.

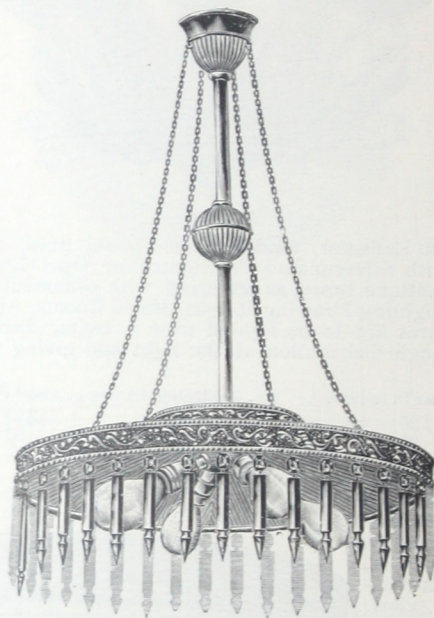

richly finished cast brass plate on bottom. Any soft shade of glass is pretty, or we can make the dome of etched glass, if desired, and the brass work will be finished in polished, antique, or any finish selected.

PRICES AND PARTICULARS ON APPLICATION.

FRINK'S SUSPENDED SINGLE CONE SILVER-PLATED
CORRUGATED GLASS REFLECTOR.

Finished with figured brass band and trimmed with one row of cut-glass prisms.

A very neat and pretty fixture.

FRINK'S PRISMATIC SUN LIGHT.

This fixture is particularly adapted to, and is largely used for lighting and ventilating the best class of Churches and Theatres. It is inserted in the ceiling, acting as a perfect ventilator, and being above the line of vision, the view of the stage is not intercepted from the highest seat in the gallery. It contains a powerful Double Cone Reflector, which thoroughly illuminates the auditorium, is trimmed with cut glass prisms and prismatic chains, and handsomely decorated in colors. The handsomest and most appropriate fixture in use for lighting a Theatre or Music Hall.

FRINK'S INSERTED PRISMATIC REFLECTOR.

Double cone, Silver-plated Corrugated Glass, with decorated corona, finished with one row of cut-glass prisms. This Reflector has the advantage of being entirely above the line of vision; and, where there are galleries, it does not obstruct the view from the highest seat therein. It is particularly adapted to some buildings and gives a brilliant light.

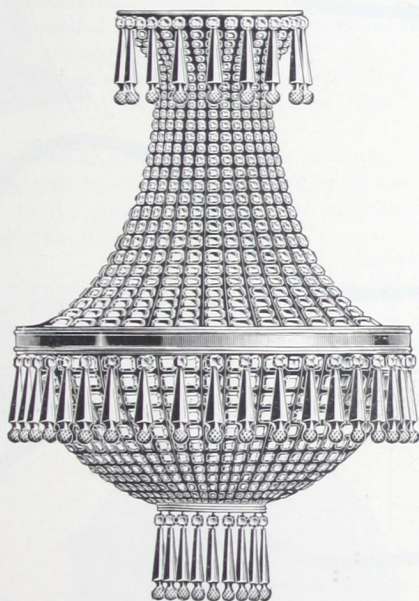

No. 2884.

PERFECTLY WATER TIGHT.

Prices on next page.

FRINK'S IMPROVED STREET FIXTURES.

Furnished complete as shown in cut with 3 or 4-foot gooseneck as ordered, made of $\frac{3}{4}$ -inch pipe, 16-inch hood, and $14\frac{1}{2}$ -inch reflector, well painted, fitted for $\frac{1}{8}$ or $\frac{3}{8}$ -inch socket. Shipped for $\frac{3}{8}$ -inch and 3-foot gooseneck unless ordered otherwise.

The hood is held between two concaved STEEL WASHERS, making it impossible to work loose by the action of the wind. It is hinged, detachable, and made of heavy tin.

The thumbscrews that fasten the lower hood or reflector are set in from the edge of the upper hood, thus avoiding a path for water and rust from the ironwork above across the white surface of the lower hood, as is the case in hoods of other manufacture.

No. 2898 is furnished with glass insulators on a MOVABLE yoke, which always keeps the grooves in line with the wires.

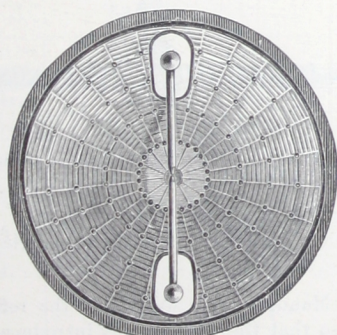

No. 2899 is furnished with porcelain insulators bolted to the branch.

No. 2900 is furnished with porcelain knobs bolted to the outside of umbrella.

The cut also shows an INSULATING branch as shown by ARROW, which can be used on the fixtures, the insulating bushing being made of vulcanized fibre which screws onto the pipe underneath the umbrella, thus insulating the entire lower part of the fixture from the pipe.

No.		List Price.	Net Price.
2898	Fixture without socket or lamp	\$3 25	\$1 95

FRANK'S COMBINATION ELECTRIC SECTIONAL GLASS CLUSTER REFLECTOR AND GAS PENDANT.

For Schools, Hospitals, Offices, Stores, Etc.

ADOPTED BY THE BOARD OF EDUCATION, and from one hundred and fifty to two hundred and fifty are used in each of the new schools in New York.

Length 42 inches, Spread 36 inches, 2 Gas, 4 Electric.

No.		Last Price.	Net Price.
2054	With 20 $\frac{1}{2}$ -inch Opal sectional glass reflector,	\$15 00	\$9 00
2055	With 20 $\frac{1}{2}$ -inch Silvered Corrugated sectional glass reflector,	15 25	9 15

To Gas Fixture Manufacturers we supply the reflector and cluster with nipples and fittings, so that they can readily introduce it in the stem of their fixture. The prices without the pendant would be as follows:

No.		Last Price.	Net Price.
2056	20 $\frac{1}{2}$ -inch Opal sectional glass reflector and cluster,	\$4 50	\$2 70
2057	20 $\frac{1}{2}$ -inch Silvered Corrugated sectional glass reflector and cluster,	4 75	2 85

ELECTRIC SIGNS.

The information given on illuminated sign letters in the following table, is merely a guide to prospective purchasers as to the approximate consumption of current and cost of any proposed sign, and is not intended as a definite price list. The information given is sufficiently accurate to apply to ordinary cases; but where certain combinations of letters are used, the prices would necessarily deviate somewhat; for instance, a sign embodying an unusual number of letters such as "M" or "W" would bring the general averages for that sign rather above the tabulated figures, and a sign embracing a number of letters such as "I" or "L" would bring it below tabulated figures.

When so requested, we will be glad at any time to submit designs and quote definite prices upon any style of sign desired, either in plain block, script or fancy lettering, and with letters unmounted, or complete and mounted upon an iron framework or solid sign-board, as desired.

PICTURE LIGHTING.

We light picture and art galleries, drawing and music rooms, and single pictures, producing special effects in lighting.

We have lighted nearly all of the private and public galleries in the country.

The Frink system of lighting has been adopted by the Metropolitan Museum of Art, New York; The Art Institute, Chicago, Ill.; Boussod, Valadon & Co., New York; Durand-Ruel, New York; Fifth Ave. Art Galleries, New York; Corcoran Gallery of Art, Washington, D. C.; Hart Memorial Library, Troy, N. Y.; R. I. School of Design, Providence, R. I.; Brooklyn Institute of Arts and Sciences, Brooklyn, N. Y.; M. Knoedler & Co., New York; Arthur Tooth & Sons, New York; Carnegie Library, Pittsburgh, Pa.; Art Palace and Woman's Building, World's Fair, Chicago, Ill., and the private galleries of Mr. Geo. W. Vanderbilt, New York; Mr. James W. Ellsworth, Chicago, Ill.; Mr. Matthew Addy, Cincinnati, O.; Mr. L. Z. Leiter, Washington, D. C.; Mr. James A. Webb, Madison, N. J.; Com. Elbridge T. Gerry, New York; Mr. Potter Palmer, Chicago, Ill.; Mr. Chas. T. Yerkes, New York; Mr. M. D. C. Borden, New York; Mr. Joseph Jefferson, Buzzard's Bay, Mass.; Mr. Wm. L. Elkins, Philadelphia, Pa.; Mr. Chas. Sedelmeyer, Paris, France, etc., etc.

Art galleries and rooms containing pictures to be lighted are always considered specially, and reflectors are designed to meet the conditions as found. We light with gas or electricity, or a combination of both, and manufacture plain reflectors for commercial use, to those of very ornate design, suitable for use in the finest drawing-room or private gallery, and make a specialty of special effects in lighting.

Send us the exact dimensions of gallery, drawing-room or picture, and state if gas or electric, and we will be glad to suggest plan of lighting, etc., and if near New York, make a personal inspection free of charge.

We have no hesitation in saying we are authority on picture lighting, and can produce for you the best results attainable.

THEATRE AND HALL LIGHTING.

Our Reflectors, Reflecting Chandeliers and Reflectoliers economically and thoroughly light auditoriums of every size. Suitable styles to match any class of architecture will be found in this catalogue, or special designs will be furnished free, if desired.

Our Reflectors are suspended so high above the line of vision that the highest point in the gallery is below them. They cannot obstruct the view, and they increase the lighting power in the main portion of the house at least fourfold.

Our Combination Ventilating and Lighting Reflectors furnish the ideal method of perfect ventilation.

Send full description of room to be lighted, with blue-prints where possible, and we will recommend sizes and kinds of fixtures, with designs and prices of all fixtures best suited for the purpose.

From thousands of commendations sent to Mr. Frink from all parts of the country, we can give extracts from but a very few, for want of space.

As the sentiment of complete satisfaction is expressed in all of them, it would be a mere repetition to extend the number.

Charlottetown, P. E. I.

Some time ago you filled an order for church lights which we have found very satisfactory. Your Reflector, etc., now hang in one of the most perfectly furnished churches in Canada, and are in every way suitable for their position, and in light-giving qualities are fully up to your representations.

HON. R. R. FITZGERALD.

Butte, Mont.

We beg to state that our customer is very much pleased with the Reflectors. They are giving perfect satisfaction.

MONTANA ELECTRIC CO.

Buffalo, N. Y.

The Window Reflectors for Mr. Knox are all up, and pronounced by him very satisfactory indeed.

WILLIAM J. SMITH,
Electrical Contractor.

Washington, D. C.

The firm of I. P. Frink, New York, has furnished all of the electric lighting fixtures in this building, and it affords me pleasure to state that the lighting of all the rooms, and particularly the picture galleries, by their system of Reflectors, has given entire satisfaction.

F. S. BARRAHN, Curator,
Corcoran Gallery of Art.

Newark, N. J.

It affords us great pleasure to state that the Reflectors with which you equipped our show windows have given entire satisfaction, the lighting being very fine, and we can highly recommend them.

L. S. PLATT & CO.

Troy, N. Y.

In relation to the serviceability of your Reflectors, placed by you in the Hart Memorial Library Building, would say that we have found them to be fully up to your representations, and also that the system calls forth commendations from art critics and other persons who visit our galleries.

DE WITT CLINTON, Librarian,
Troy Young Men's Association.

Mt. Carmel, Pa.

The Electrolier and Reflector, we are pleased to state, give entire satisfaction, and the church is beautifully lighted.

W. T. WILLIAMS, Trustee,
First Tabernacle Congregational Church.

Rockdale, Tex.

Everybody is pleased with the Reflector and it is really splendid and a perfect beauty. We have no lack of light anywhere in the building. And so far as our experience goes, if we had to buy again, we would have a Frink, and no other. We are highly pleased and have a beautiful light.

REV. A. J. KINCAID,
First Baptist Church.

West Point, Ga.

Our brilliant Frink Reflectors give perfect satisfaction and light our auditorium as bright as day.

REV. J. F. EDEN,
Baptist Church.

Tiffin, O.

The special Window Reflectors you shipped us last December are giving excellent satisfaction.

RONIG & SHAFER.

Somerset, Ky.

The Reflector gives perfect satisfaction and the church is handsomely lighted throughout.

REV. W. E. ARNOLD,
M. E. Church, South.

Newberry, S. C.

Everyone who sees the new fixture in our church is delighted with it, because it combines in a marked degree the useful with the beautiful. It is the consensus of opinion we have the best lighted building in the city.

B. M. AULL,
For Lutheran Church.

St. John's, Newfoundland.

We have the church Reflector in operation and the parties interested are well pleased and express themselves as thoroughly satisfied in every respect.

ST. JOHN'S ELECTRIC LIGHT CO.

Portsmouth, O.

The Reflectors are giving excellent satisfaction and we have a brilliant light. We are highly pleased.

W. K. DUPRE, Treasurer,
Sixth Street M. E. Church.

New Berlin, N. Y.

The church people, as well as ourselves, are very much pleased with the Reflectors, both as to appearance and effectiveness in lighting.

NEW BERLIN LIGHT & POWER CO.,
For Presbyterian Church.

Columbus, O.

The lighting of the Senate and House Assembly rooms by electricity is giving most excellent satisfaction, and the Reflectors furnished by you are much admired.

PROF. BENJ. F. THOMAS.

Buzzard's Bay, Mass.

I enclose check for the full amount of your bill. The work is entirely satisfactory. Your men are excellent workmen and it is a credit to any establishment to have such able and conscientious employees. I have much pleasure in recommending your work.

JOSEPH JEFFERSON.

Chicago, Ill.

We enclose herewith copy of a letter from the World's Columbian Exposition stating that the Frink Reflectors in the Art Gallery have been installed in a complete and satisfactory manner. We hope that this letter will be all that you need to release your bond.

WESTINGHOUSE ELECTRIC & MFG.
CO.

E. E. Keller, Mgr. & Gen. Supt.

Cleveland, O.

The Window Reflectors are all up and burning gloriously. Our customer is highly delighted with them.

MERRELL & HORNE,
Electrical Contractors.

New York, N. Y.

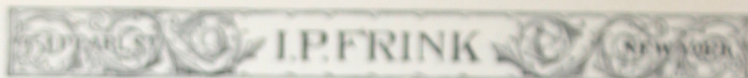

Numerous experiments were made in lighting with incandescent lamps one of the galleries in the museum for a sample light, but none proved satisfactory until you lighted one side of one gallery with your Reflectors. As soon as it was shown in operation to the Trustees of the Museum it received unanimous approval, and was adopted at once and ordered for use in all of the picture galleries in the Museum. I have no hesitation in giving your system my unqualified endorsement, and take pleasure in saying that I consider it the best that has hitherto been produced for lighting picture galleries by artificial light.

L. P. DI CESNOLA,
Director Met. Museum of Art.

Pittsburgh, Pa.

Your Reflecting Chandelier and fixtures in eighteen months of use have won for the Fourth Presbyterian Church the name of being the best lighted church in the city. This is corroborated by 150 ministers and laymen assembled recently in local Presbytery, and pronounced by them to be the best lighted building they had ever ministered in. We are thoroughly pleased and consider your fixtures the best money investment in our building. Complimented by all, criticised by none, artistically beautiful, mechanically no tinsel. Hoping that all future church building committees may consult you, and thereby see through a glass lightly, I am,

F. D. STONEROD.

1 Wall Street, N. Y.

Accept my acknowledgment and find check herewith. It is my preference and custom always to deal with original inventors in the use of practical inventions. They are entitled to that consideration, and do better for their customers in skill and interest than practical imitators, as a general thing.

W. WHEELER SMITH,
Architect.

Milton, Pa.

We have the finest church light in our town. It is a beauty and gives entire satisfaction. It could not be surpassed. We require no side or pulpit lights at all, and are very much pleased. Will be glad to recommend it to anyone needing a first-class light and an ornament to a church.

G. M. MEANE,
For First United Evang. Church.

Millville, Pa.

My people are highly delighted with the splendid light and the beautiful appearance of your Reflectors. Everywhere they receive words of commendation. Other churches speak in the highest terms of justice of our well-lighted church, and I can cheerfully recommend them to any one who wants a good light, and they will make no mistake if they order a Frank Reflector. They excel all, and if anyone doubts it, let him go and see a church lighted with them and be convinced.

HEN. D. Y. BROUNCE,
First M. E. Church.

New York, N. Y.

I take pleasure in saying that the lighting of the art galleries of Mr. George W. Vanderbilt, done by you, was most satisfactory.

E. M. HUNT, Architect.

1 Rue de la Rochefoucauld,

Paris, France.

Your system of Reflectors for lighting paintings and your arrangement for lighting my private gallery are thoroughly satisfactory to me, and I take pleasure in recommending your work.

CHARLES HEDIGHEIMER.

Waterloo, Ont.

I am very much pleased to state that the Reflectors are giving entire satisfaction to the committee and congregation. Personally I feel very much gratified as to the lighting power of your Reflectors, as a certain party in Toronto tried very hard to furnish the Reflectors; also the party who wired the church for electric lighting tried to work in another firm's Reflectors. However, your Reflectors were given the preference, and now everything in connection with the power of lighting proving so satisfactory, relieves me of all unfriendly criticism. We have tried the Reflectors thoroughly, and have absolutely no fault to find.

CHAS. MORRIS,
Architect Presbyterian Church.

Oneonta, N. Y.

One of the churches of this place is about to put in new lights. The Reflectors in our Normal School, furnished by you three years ago, do so well that personally I want your Reflectors in the church, as I believe in them and am anxious to have them.

JAMES M. MELNE, Principal,
Oneonta Normal School.

(The Reflectors for the church, Presbyterian, have since been ordered and pronounced satisfactory.)

Danbury, Conn.

Our church was lighted by electricity only the other night, and the Reflectors and fixtures gave entire satisfaction. On account of the full attendance the S. S. Room was thrown open, and the effect was surpassingly pleasing throughout.

L. L. HUBBELL,
First Universalist Church.

Danbury, Conn.

Your men finished our work up in good shape before they left the other day, and I take pleasure in writing you that we are very much pleased with the return for our new church, both as to design and workmanship. The central chandelier is very much admired and lights up beautifully.

C. S. FAIRBANKS,
For Second Baptist Church.

Beverly, Md.

We are all very much pleased with Reflector; it lights the church beautifully, and I am glad to commend it.

C. H. R. MERRICK.

New York, N. Y.

After carefully observing and testing, on the opening night of my new theatre, the elegant Reflecting Chandelier that you put in, I must say that it is satisfactory in every respect, and is a grand and beautiful addition to my theatre.

H. C. MINER.

Constructing Quartermaster's Office,

Fort Riley, Kan., Nov. 16, 1897.

The reflectors and other fixtures came to hand, and I am very agreeably surprised with the fine workmanship and superior finish of all the appliances. They are highly satisfactory in every way.

GEORGE A. RUHLEN,

(For Government Chapel),

Captain and A. Q. M., U. S. Army.

Indianapolis, Ind.

The fixtures give excellent satisfaction. The large hall is so well lighted, that we can see to read the smallest print in every corner. Thanks for kindness, &c.

Rev. P. FRANCIS HAASE, O. S. F.,
Sacred Heart Church.

Brooklyn, N. Y.

I am pleased to be able to state that the work which you did for us in our new Church gives perfect satisfaction.

Rev. J. A. HARTNETT, C. M.,
St. John's College.

Quakertown, Pa.

The Reflector was put in position last week and used for the first time yesterday. It gives entire satisfaction; the decorations of the corona harmonize perfectly with the tints of the room. It gives more light than we had expected, and anyone can see perfectly to read in all parts of the church. Our church was the fourth in town to adopt electric lighting, and a gentleman who takes a great interest in electrical matters, pronounces ours the best lighted church in the town.

SAMUEL F. BERGER.

Ohio State University,

Columbus, O.

I might add that the 20 $\frac{1}{4}$ inch cluster reflectors, corrugated, are very satisfactory indeed, and I shall use them always in future with clusters wherever I can.

Prof. F. C. CALDWELL.

Albany Historical and Art Society,

176 State St., Albany, N. Y.

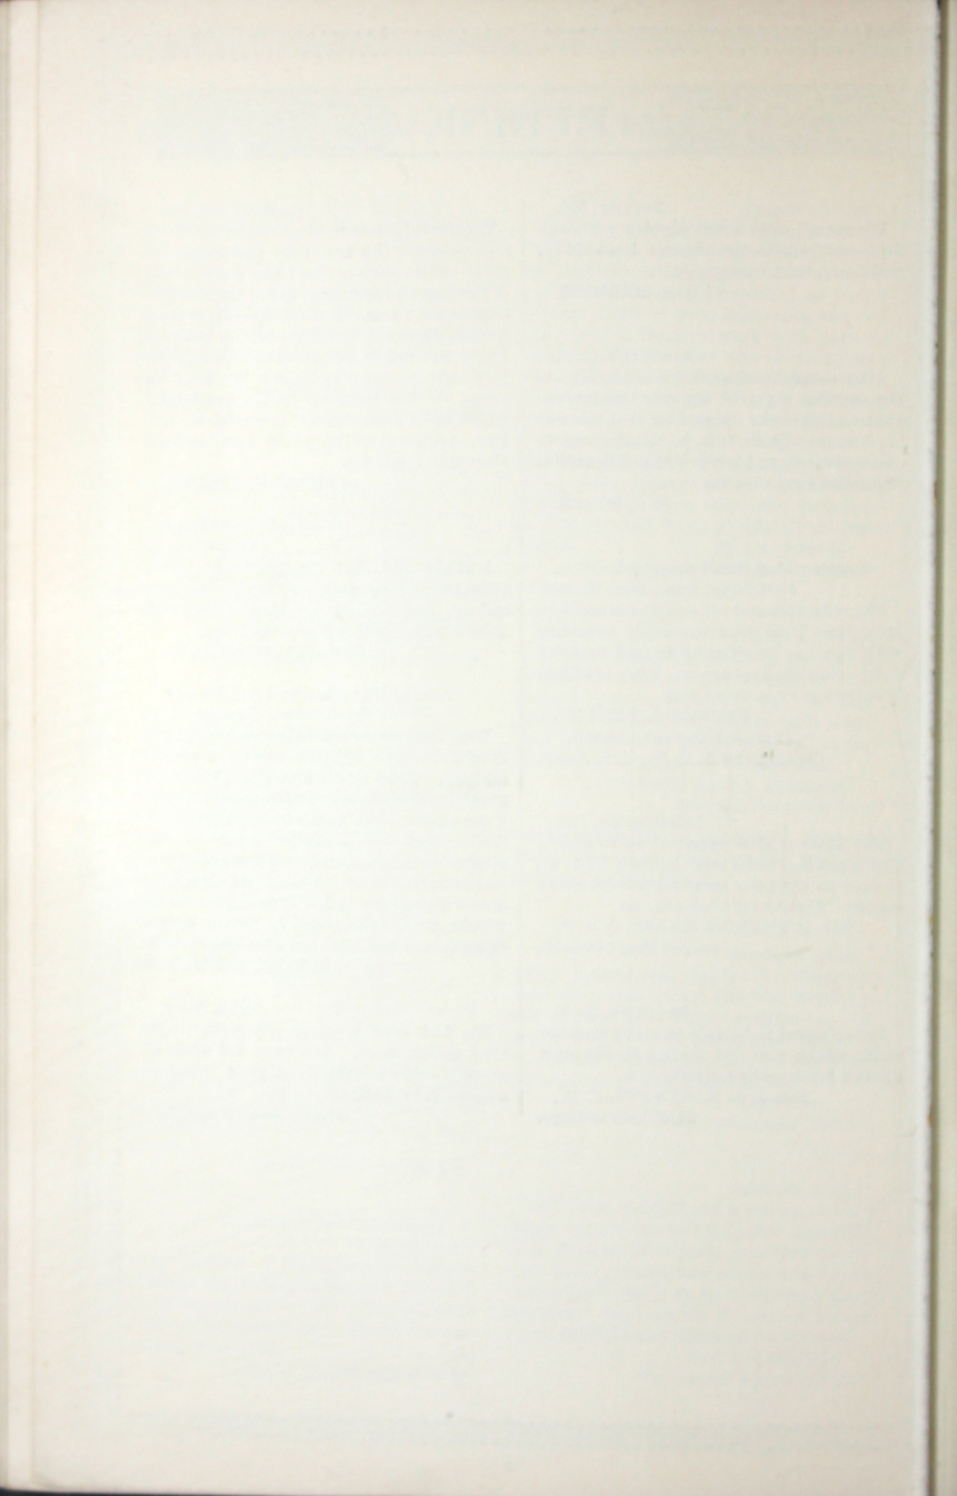

Your fixtures are a great success and have been seen and admired by 20,000 people already. Your name and fame has been proclaimed in three different papers by me. I mentioned your name to Mr. Hopkinson Smith, and called his attention to the admirable lighting, and told him about you and your successes. A man like him, who goes everywhere and whose words carry weight with everybody, is worth something to any one who has anything to sell.

G. D. MILLER, President.

Lynn, Mass.

We find your window reflectors to be very satisfactory. We have 170 feet of show windows lighted by your reflector and we get excellent results.
